FOR IMMEDIATE RELEASE
9AM CDT, Date January 5, 2010

Houston, Texas – Paradigm Consultants, Inc. is pleased to announce our involvement in Non Destructive Examination (NDE) on numerous land-based drilling rigs located throughout the world. Our Certified Welding Inspectors (CWI) and NDE specialists have traveled to Libya, Pennsylvania, North Dakota, and throughout Texas to verify project compliance with American Petroleum Institute (API) Specifications. Paradigm has future assignments to perform these services in Colorado, Montana, Wyoming, and the Ukraine.

Paradigm provides development and application of NDE techniques, necessary for the evaluation of critical, valuable, or massive components that must be tested without destroying structural integrity. Paradigm has a team of full-time NDE specialists trained and certified to use magnetic particle, liquid penetrant, and ultrasonic methods in accordance with American Society for Non Destructive Testing recommended practice SNT-TC-1A. In addition, NDE Services are conducted in strict compliance with our own in-house Quality Assurance / Quality

Control manual developed to comply with the requirements of ISO 17025 and our lab is accredited by the American Association for Laboratory Accreditation (A2LA).

Paradigm Consultants, Inc. is a Houston-based firm providing our public and private clients with professional geotechnical engineering, construction materials testing services, and environmental engineering services. In 2005 the firm was named the Port of Houston Authority's Small Business of the Year.

The Power of Paradigm
